DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 11, lines 2-5 lack sufficient structure for the functional language of "the steps of placing the work and a fine metal powder producing material into a treating vessel, thereby adhering a fine metal powder

produced from said fine metal powder producing material to the surface of said work."

Claims 13/1 and 13/2 lack sufficient structural support for the functional language of an electroplating treatment.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Koike et al.

[JP411003811A].

Art Unit: 2832

Regarding claim 11, Koike et al. discloses a ring-shaped bonded magnet [12] having a film layer [16, 18] coating the entire surface [figure 1] of the magnet including a fine metal powder [see constitution] coating an entire surface thereof.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al. in view of Yamamoto et al. [US 5,649,362].

Koike et al. disclose the instant claimed invention except for the bonded magnet having a length to diameter ratio greater than 1.

Yamamoto et al. disclose a bonded magnet having a length to diameter ratio greater than 1.

It would have been obvious to a person having ordinary skill in the art at the time invention was made to use a length to diameter ratio greater than 1 for the magnet of Koike et al., as suggested by Yamamoto et al., for the purpose of securing mounting a shaft thereto and providing a ring shaped magnet roller.
